	Novelty (N)	Claims	1-34	YES		
		Claims		_ NO		
	Inventive step (IS)	Claims	1-34	YES		
		Claims		_ NO		
	Industrial applicabilit	ity (IA) Claims	1-34	YES		
•		Claims		_ NO		

2. Citations and explanations (Rule 70.7)

Reference is made to the following document:

D1: US-A-5 400 012 (WALTON DANIEL G)
21 March 1995 (1995-03-21).

Document D1, considered to be the prior art closest to the subject matter of claim 1, describes a breathing monitor.

The subject matter of claim 1 differs from the apparatus according to D1 in that the sensor is not mounted on a substrate which, in turn, is in direct contact with the substance.

The subject matter of claim 1 is therefore novel (PCT Article 33(2)).

The problem addressed by the present invention can consequently be regarded as that of simplifying the assembly of the apparatus by using a flexible membrane rather than a bag (as used in D1). Moreover, the application is advantageous from the point of view of cost, weight and space requirement. Furthermore,

Box No. V

Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

consequent upon the direct measurement of the pressure of the fluid, as opposed to measuring the displacement of the piston caused by the increase in the pressure of the fluid, transmission is improved and the constraints can be better accommodated.

The solution to the above problem, as proposed in claim 1 of the present application, is considered to involve an inventive step (PCT Article 33(3)).

The same arguments apply *mutatis-mutandis* to independent claim 29.
